

# Nonstop

## Tech Used

## Nonstop is...

A mobile application that allows users to login and share a favorite song, once a day. Upon doing so, users can include a caption/photo, as well as view friends' shared songs and profiles.

In addition, commonly posted songs will be posted within the “Trending” page. Users may also customize their personal profile with songs, albums, and artists.

## Goals

- Create meaningful connections and interactions through music
- Promote musical discovery and allow users to expand music tastes
- To create a social media experience/platform revolved around music
